BRIDGE

Up to the end of year 2015, CCSEB has constructed 230 bridges which across over Yangtze River, Yellow River and other major rivers in China.The structure of these bridges covers suspension bridge, arch bridge, cable-stayed bridge, and continious beam bridge.

BRIDGE
WORK EXPERIENCE

Special Features:
This bridge is a double-decked cable-stayed bridge across the Yangtze River, top deck for vehicle transportation, bottom deck for rail transportation.

Project Profile:

- Total length of project: 6,066m
- Total bridge length: 2,079m
- Main bridge length: 897m
- Main bridge superstructure: Twin-pylon double cable plane three spans steel trussed beam cable-stayed bridge
- Span arrangement: 216.5+464.0+216.5m
- Main span length: 464m
- Main bridge foundation: Bored piles
- Main bridge pile amount: 52
- Maximum pile diameter: 3m
- The height of cable pylon : 188.3m

BRIDGE

Project Name: Section I of Dingshan Yangtze River Bridge and Approach Road of Chongqing Jiangjin District
Location: Chongqing City
Contract Amount: US$317.5 million
Contract Duration: Oct 24th, 2009-Jun 26th, 2013

BUILDING
WORK EXPERIENCE

Project Name: MAK Tower Project Complex
Location: Ulaanbaatar city, Mongolia.
Contract Amount: US$ 110 million
Contract Duration: June 2020- Dec 2022

Project Profile:

- **Tower floors :** 44 storeys
- **Tower height :** 203.5 m
- **Total Built-up Area :** 80,486 m²

This project is a large-scale urban complex project integrating commercial, office, entertainment, catering, hotel, automatic parking and other functions.

BUILDING

K8 HuiYuan
湖畔春秋K8别墅

K8 Hui Yuan

K8 Huiyuan is surrounded by water on three sides. The water element is like a flowing medium, through which people think about the relationship between space and nature. Take water as the medium, meet the water color and sky light, take light as the quality, build a elegant luxury residence.....

As a multi-functional open space for families, the first floor is open, free and social, making life more possible. It integrates garage, entrance storage, reception, kitchen interaction, study, garden and other areas to meet the needs of families, such as car entry, dinner, reception, outdoor leisure and dynamic storage.

The second floor private room, luxurious lifestyle, encounter Milan as the design inspiration - as Italy's fashion, design capital, it exudes an incomparable unique charm. From the Western art works gathered in this city, find the corresponding elements in the city, and "touch" the pulse of Italian literature and art, and experience people's pursuit and spirit of elegance and fashion.
The design of the negative first floor is based on ancient Roman architecture, and uses symmetry, axis, proportion and other ways to arrange and combine in the space. The sense of order in classical style creates a unique space symbol, and realizes the indoor architecture language!

"Water" creates two vector worlds of inspiration and space solidification, achieving the harmonious resonance of design concept and residential property.

SHIMAO

世贸香槟湖192

Life is a group that can sense the boundary between the organic and the inorganic. We use design to give organic life language in inorganic space.

When we assume that the collision of natural elements can really produce chemical reactions according to the equation, how to interpret the relationship between nature and human through design, and build a modern life scene in the space that nature and humanity complement each other?

Nature = sunlight + soil + water + air

Wensha Villa

温莎别墅811

Under the designer's brush, this case takes "landscape artistic conception, landscape between" as the theme, condenses the art of life between traditional square and landscape nature, uses abstract artistic techniques to translate and express, integrates the artistic conception of excellent aesthetics into interior design and soft decoration design, and creates an experience scene of urban landscape meeting place where people live in prosperity and return to nature. Open people's pursuit of poetry and quality of slow life.

The smooth and smooth lines in the home space can not only make the furniture have the artistic beauty of elegance and comfort, but also have absolute advantages in comfort.

Balance between the old and the new

老宅新生-玉隆花园

Balance between the old and the new

"With the continuous construction of real estate projects, there is less and less land available for development in the city center, and new projects are further and further away from the city. At the same time, the old houses and communities existing in the city center are faced with: 1. Reconstruction, huge investment; 2. Demolition will cause urban pollution and waste of resources.

Designed for optimal living comfort, the master bedroom is equipped with a living room, separate cloakroom and separate wet and dry toilet.

The biggest limitation of the renovation of the old house is that the building structure is fixed, and the design breaks through the original frame from the function, so that the old house has a different sense of space; In terms of form, wabi-Sabi aesthetic, which is usually reflected in the open space, also showed a thriving power in this small space.

Meilinhu

美林湖别墅20

Life is not about grandeur, it's not about settling,
But in the place suitable for their own pursuit of the heart, to highlight the temperament and quality of life of the owner of the house.

And soft clothing is the bridge between us and life
The placement of each item has the temperament carried by the unique space.

Meilinhu

The "contemporary", "cultural", "artistic" co-fusion, symbiosis, as a design language for space expression. Seek inspiration for design from the common and collision between tradition and the present; In the intersection and harmony of art and life, the pursuit of space temperament aesthetics, looking for the spiritual appeal of design culture.

The beauty of nature, beauty in the myriad; The beauty of Oriental culture lies in washing the heart and raising aspirations.

The beauty of the interior furnishings, the United States in a condensed soil, highlight the humanistic temperament, dialogue spirit of The Times.

Longhu

龙湖紫宸

In space, not bound by any identity, able to express one's love and cultivate and nurture the continuity of emotions. Using visual recording to showcase the designer's personality in the home space, interpreting the designer's design philosophy and attitude towards life.

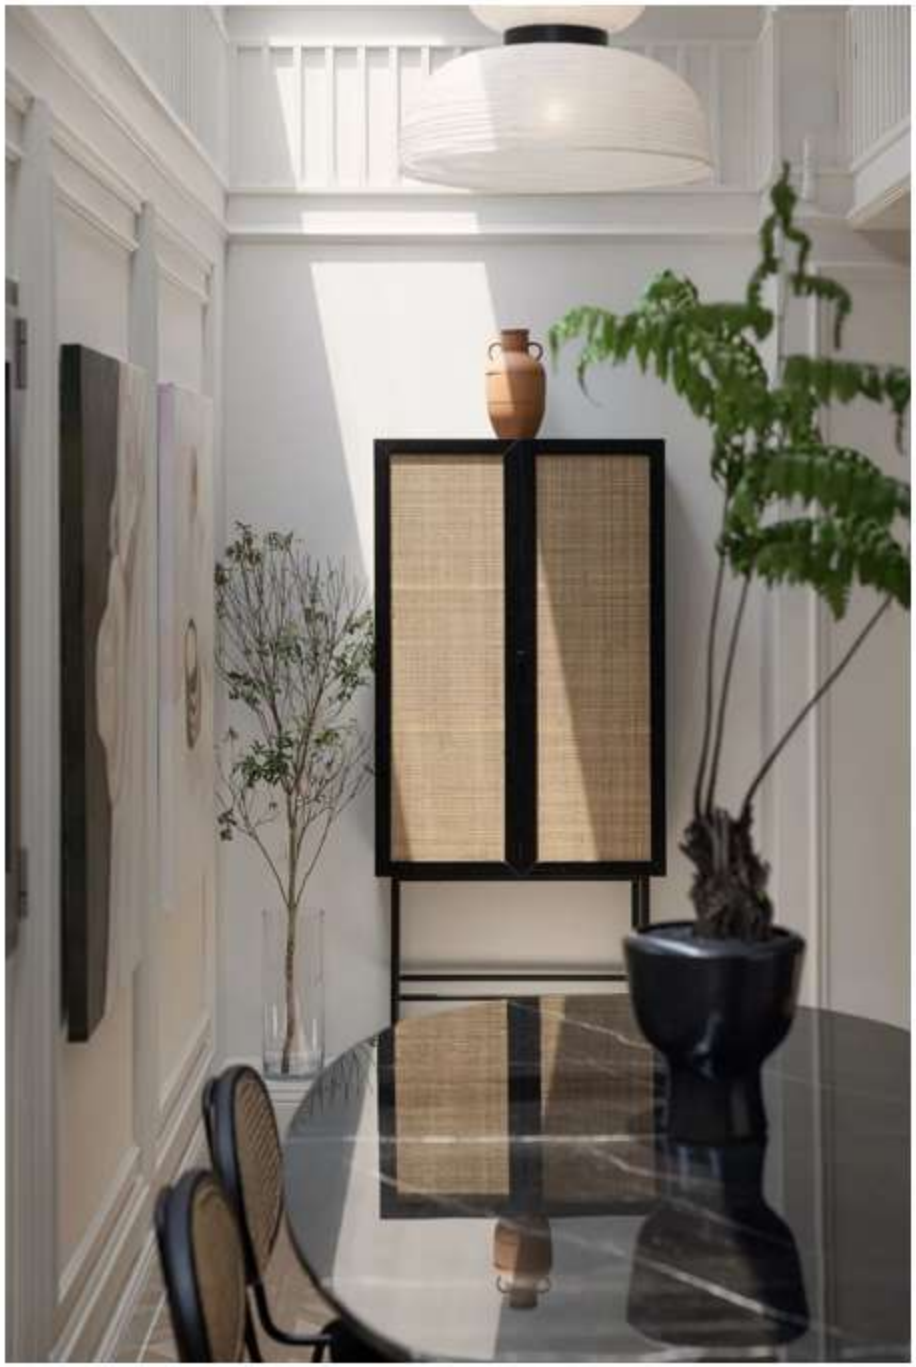

Sitting in the reception area on the first floor, taking a nap and basking in the sunshine. Aesthetic pursuit is based on one's own depiction of an ideal life, creating an atmosphere, and presenting an attitude towards life.

Shandong Mei Heng villa

山东美恒别墅样板房

Dreaming back to the Tang Dynasty, inheriting classics

Cultural Jining, the hometown of Confucius and Mencius, the capital of the Grand Canal

The vast expanse of blue waves embraces the banks of the Grand Canal, encompassing the hearts of both ancient and modern Chinese and foreign cultures. A canal has nurtured unique culture and life, giving birth to several branch lines of cultural heritage! Under the guidance of countless branches, the prosperous Tang and Song dynasties were among the leaders. The Tang Dynasty was open and inclusive, and the prosperous era of the Ten Thousand Kingdoms brought the concept of the "prosperous Tang Dynasty" of the most prosperous period of canal culture into it, "Dreaming back to the Tang Dynasty and inheriting classics"

Search for new forms and colors to infect the audience with a strong atmosphere; The color combination of modern new Chinese style is often extracted from the color atmosphere with cultural origins and brand significance. Tang Sancai from the prosperous Tang culture is extracted as a soft decoration color tone, and then matched with elegant gray, light coffee, and ash blue to present rich and full-bodied colors, and feel the beauty of modern Chinese luxury.

Shanghai Jiuguantang

上海九间堂（在建项目）

Shanghai Jiuguantang

Shanghai Jiujiantang Villa, as a quiet and elegant residence in the city, cleverly integrates traditional Chinese aesthetics with modern living needs in its interior design, creating a living space that is both quaint and elegant, and comfortable and livable. This design is centered around rosewood furniture, carefully arranged to allow everyone who steps into this world to feel the rich cultural heritage and harmonious coexistence with nature.

Nanjing Villa

南京别墅（在建项目）

Nanjing Villa

Nanjing Villa is located in a city where history and modernity are intertwined. Its design inspiration comes from a profound understanding of the "new charm of ancient capital", cleverly integrating modern aesthetics with artistic creativity to create a living space that respects regional culture and leads the trend of the times.

The design of villas in Nanjing not only reflects the pursuit of modern aesthetics, but also integrates a profound understanding and respect for art, making every space a bridge connecting the past and the future, nature and culture, allowing residents to enjoy the convenience of modern life while also feeling the nourishment of art and culture.

Taihuyuanzi Villa

太湖院子（在建项目）

The ideological foundation of design originates from the love for all things, exploring the true personality soul in nature, and allowing the artistic expression of space to carry the rhythm of nature.

And through the rhythm of design, it inspires people's associations with beauty and explores new ways of life in the future.

Design to simplify complexity and achieve "de decoration", aiming to create an exploratory and growth oriented functional space that integrates social, entertainment, and home art.

Integrating natural concepts and spatial art into design, combining technology and humanization to achieve a harmonious and symbiotic multidimensional space in residential buildings.

Not deliberately pursuing novel visual experiences, creating a sense of belonging and a joyful space for the soul, breaking boundaries and exploring new life.

Taihu yuanzi Villa

Creating extraordinary luxury spaces should return to the heart, starting from lifestyle, echoing nature and self, and creating a sense of joy and belonging

HUPANCHUNQIU

湖畔春秋V86（在建项目）

Nowadays, more and more people are pursuing minimalism, wanting to break free from the constraints of material desires and restore their lives to simplicity and simplicity. Outdoor buildings use neutral colors such as natural wood, high-end gray, and black and white, perfectly showcasing the modern lifestyle through extreme contrast and fusion.

he design of the fitness and entertainment area maximizes the integration of outdoor architecture and landscape effects into the indoor view through large areas of roof glass windows, capturing the fleeting moments of time and scenery through the concept of a scenic space. The dark wood veneer in the water bar area contrasts with the elegant white bar counter in depth and depth. Under the marble material, the refined aesthetic of leaving white space extends along the grain and vein, presenting a simple and atmospheric artistic tone.

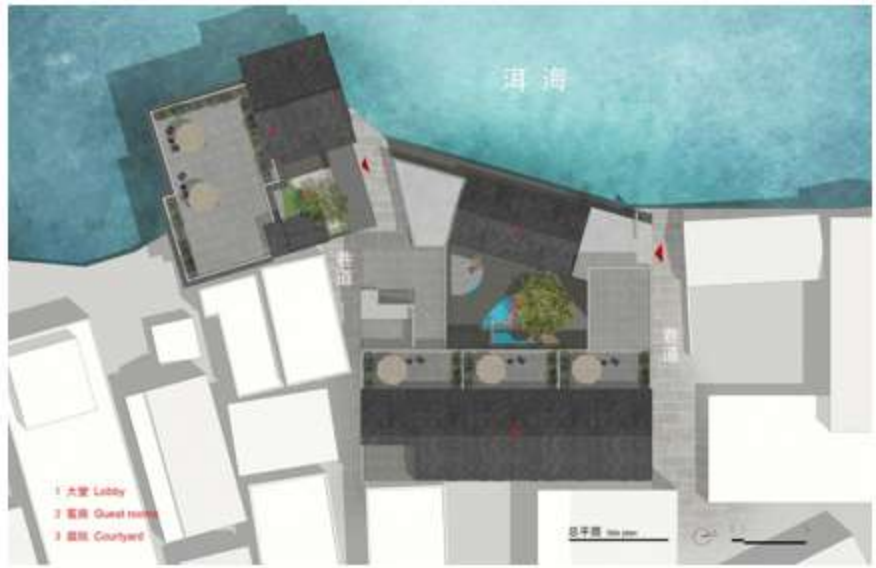

In the SPA area, relieve the burden, focus on health and enjoy relaxation outside the hustle and bustle of the city!

Thousand Mountains Retreat

千山境民宿

Thousand Mountains Retreat

Qianshanjing is a small white building beside the Taihu Lake Lake, which is located in one of the few remaining small fishing villages in Suzhou - the Taihu Lake Fishing Port Village, Guangfu Town. Each room here is a lake view room facing the Taihu Lake Lake. When you open your eyes in the morning, you can see the whole "orange sea" rushing into your eyes. The vast the Taihu Lake Lake is red by the sunrise like a big orange in the sky. The sound of the lake water slapping the reef comes from nearby, and the inner peace and happiness arise spontaneously.

Yanhai Homestay

言海民宿

Hainan Westin Hotel

海南威斯汀酒店

Project Location: Hainan

Project Area: Hotel

Project style: 100,000 square meters

On the Shimei Bay beach, which is known as the "most beautiful" beach in Hainan, a 4000 year old community of single green skinned forests stretches along the coastline. They have been protected by the government since the Guangxu period of the Qing Dynasty and are currently one of the only three pure green skinned forest communities on beaches in the world. The Westin Shimei Bay Hotel, covering an area of nearly 120000 square meters, is located here, and the unique geographical environment provides YANG with a continuous source of design inspiration. Combining the natural leisure and vibrant brand positioning of Westin Hotel, YANG ingeniously moved the natural distribution of vegetation and water sources in the green forest into the hotel lobby with the theme of "Exploring the Green Forest". The natural patches, tree trunks, and other elements of the green forest were extracted and replicated on screens, carpets, and walls.

松健堂民宿酒店

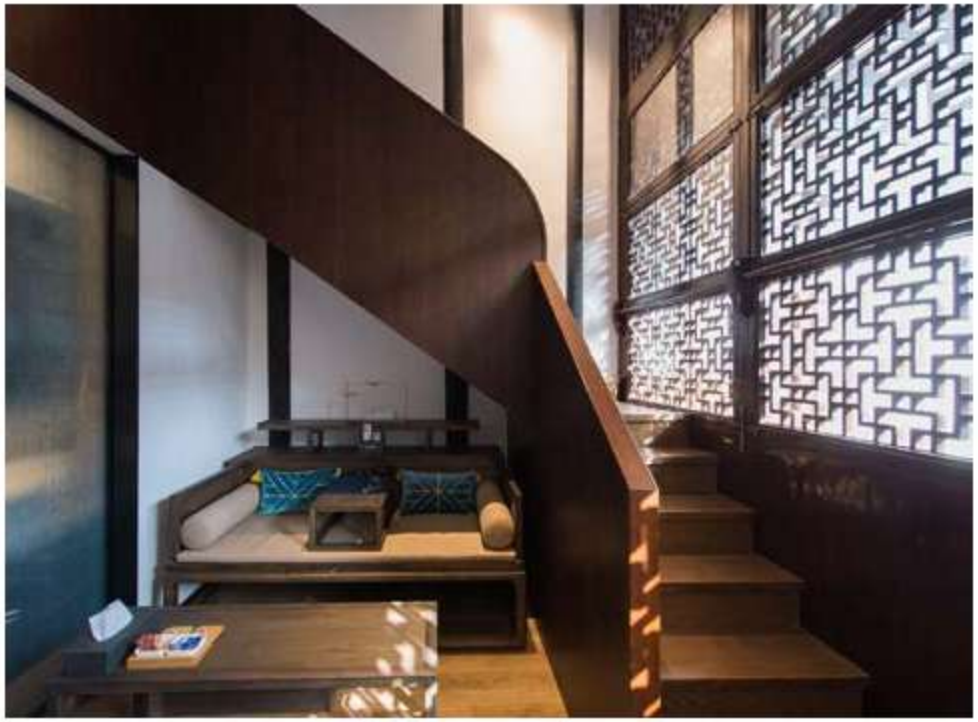

Suyan 宿宴

Suyan is a grilled food restaurant, and the owner hopes to match its superior ingredients with a brand new environment and provide customers with a unique dining experience. This is also the starting point of the design of this project. Therefore, we hope to create a quiet and natural dining atmosphere. Through the design of the spiral tunnel entrance, people have a sense of exploration and a process of meditation. Passing through it, entering the hall, leaving behind the noise of the outside world, and tasting food with the calmest heart. The use of bamboo, wood, and cement materials expresses the harmonious relationship between humans and nature, which is comfortable and full of artistic conception. It also implies that good food is a gift from nature!
