VAT & MORE

EUROCOM VAT & MORE

EUROCOM is a unique consulting company providing a wide range of transport, transit, logistics, and customs clearance services. With more than twenty years of experience, we offer tailored, high-value solutions based on our costumers needs and requirements.

EUROCOM was founded in 1988 as a personal company covering basic market needs in the provision of Customs clearance services, mainly for cutting-edge mechanical equipment of the time.

Climate change and company's appeal to the Customs Disputes Committee, which resulted in the abolition of the 30% Luxury Tax on these items in 1989, contributed to the vertical increase of their imports. This development gave the company specialization in the area and resulted the rapid growth of our operations through the representation of large international production and domestic distribution companies.

In 1992, EUROCOM transformed into an LTD Company and expanded its activities to transport, transit and logistics services. Although remaining its focus on the provision of Customs and Consulting services the company expanded the items to be imported with penetration in the market of shipping, leather goods, renewable energy sources and other mechanical equipment.

With the establishment of the Strategic Partnership with the COSCO Group in 2014 for the design of transit trade processes in the port of Piraeus, and after of more than 20 years of successful course in the management of Customs clearance procedures and the provision of relevant services, EUROCOM certified as an Authorized Economic Operator (AEOC) and transformed into an SA Company. Quality of services attracted multinational corporate customers, such as that of HP, ZTE, WAIKIKI, JINKO SOLAR, SUNTECH etc. overtaking the transfer of their flows from the port of Rotterdam to the port of Piraeus.

What we Offer

EUROCOM VAT & MORE

As a company with a customer focused operating model, we always try to keep things as simple as possible by creating a single information entry point for our customers and consolidating multiple logistic services under our administration. We offer multiple “one stop shop” services depending on your specific needs, either directly through us or indirectly through our large network of partners.

What we Offer

Services

EUROCOM VAT & MORE

We are here
to give you a solution
You need to replan your Gateway to Europe?
You need a new TAX/Customs plan for your company?
You need to simplify your procedures for your flows?

We can simply ensure measurable cost and time.

Services / Consultancy

We offer consultancy services to companies that wish to operate trade flows moving or passing through Greece. Our specialists can offer advice and strategic planning tailored to your individual needs, using the latest special customs regimes and achieving cost and time efficiency on procedures. In addition, through advisory on VAT subjects, we can achieve improved cash flow management on companies that operate in Greece and around the globe. For more details on tailor made solutions for your company, feel free to contact us.

- Various customs simplification procedures

Services / A.E.O. Certification

GR AEOC
00401919520

Directorate General Customs and Taxation © European Union 2007 – 2020

A.E.O. certification is lately becoming a necessity for companies operating in global trade from and towards Europe. As such, we can offer assistance in applying and complying with A.E.O. license initial screening and various audits from customs authorities that are required to acquire the certification. The most important advantages that A.E.O. certified companies enjoy are:

- Less physical controls and document checks
- Priority in handling loads, if selected for inspection
- Selection of the place of the inspections
- Easier subordination to customs simplifications

We can also represent companies by using our AEO.C. Certification, granding same benefits on simplified procedures.
